Simple, Fast & Goof-Proof!!!

Alpha[®] Profiler V-30 & V-40

Whether you are working with granite, engineered stone, porcelain, marble or limestone and you need to deal with the variety of thicknesses that is inherent in all stone slabs. Although the slab has a specified thickness, such as 1-1/4" (3cm), the nature of the material does not always cut to exact specifications.

To piece together long slabs for counter tops that are not uniform in thickness, is a difficult task for any fabricator. In the past, the fabricator would have to calibrate the thicker slab to match the other slabs being used. Not any more!

Introducing the Alpha[®] Profiler V-30 and V-40. A unique wet wheel designed for bullnose edge profiling that will eliminate the time-consuming calibration process. Our patented design shapes a professional looking bullnose edge in no time. The Alpha[®] Profiler V-30 and V-40 will work on all popular water-fed polishers.

You do not need to be a big fabricator to produce a big job! Just choose the Alpha[®] Profiler V-30 or V-40.

PART NO.	SIZE	MAXIMUM RPM	ARBOR	SHAPE
PFV301	1-1/4" (3cm)	3,500	5/8"-11 Threaded	Full Bullnose
PFV401	1-1/2" (4cm)	3,500	5/8"-11 Threaded	Full Bullnose

US Patent No. 7,094,136
